

# CHARLES BLACKSTOCK

## Projects

---

### Tetris on Javascript

Re-created the classic Tetris video game using only vanilla javascript and canvas.

### Angular Translator Quiz

This was my first Angular app. It allows users to create a profile and either practice their translation skills, using the Bing translator API, or take a 10 question challenge on the languages they have selected.

### Angular Game Map with Steam API

This was a small group project creating an app that would organize the users game library from Steam and give them more information about the games they own. We did this project in AngularJS and utilized the Steam and Giant Bomb APIs.
